

## IO: NPR's Enterprise Asset Management System

Storage Abstraction - Workflow Orchestration - Long Term Preservation

David Julian Gray: Sr. Enterprise Architect; Joe Kampschmidt: Sr. Software Architect; Shahryar Arvin: Sr. Software Architect;

Cory Aiken: Director Software Engineering Surya Mudiya: Software Development Manager Julie Rogers: Curator/Historian

Library of Congress Designing Storage Architectures for Digital Collections March 15, 2022

#### Overview

#### The problem

- Where's my stuff?
- Digital media evanescent
- Archival format is "constant migration"
- Solution Data/storage abstraction
  - Build vs buy?

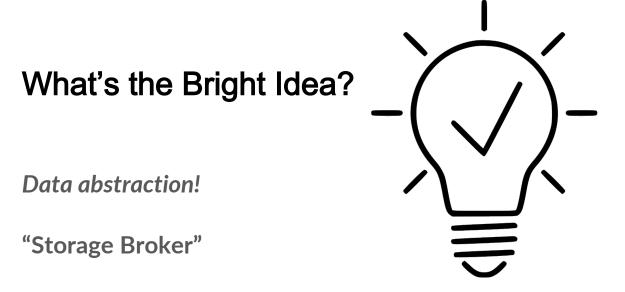

Technical Overview of IO - NPR: "How I built this"

### NPR IO: Problems to Resolve

- Ensure File Integrity
  - Find it now Find it at any arbitrary later date
- Streamline and lubricate workflows :
  - Integrate disparate systems
  - Eliminate siloed storage and content management
  - Incentivize compliance
- Contain costs
  - Provide usage and capacity analytics
  - Move content without breaking relationships

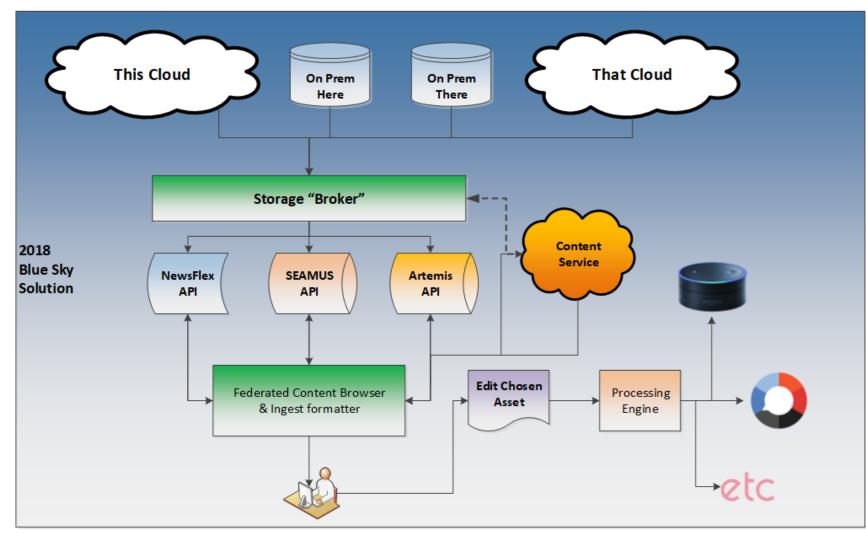

- Intermediate access layer pointing to perennial GUID and link
- Media can move among and between storage as performance and cost containment require without breaking content management and production tools.

Federated search engine

#### NPR IO

- Enterprise Media Asset Management
- Content Repository
- Workflow Orchestrator
- Asset Repurposing Engine
- Preservation Asset Arbitrator
- Federated Search Platform

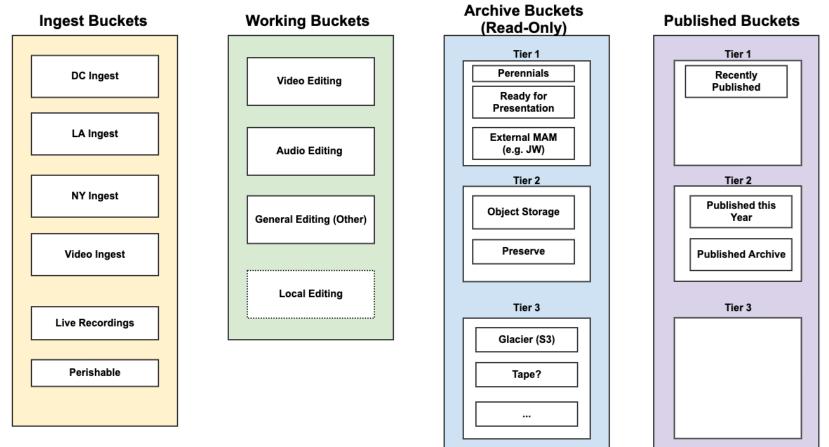

### NPR IO-Key concepts and components

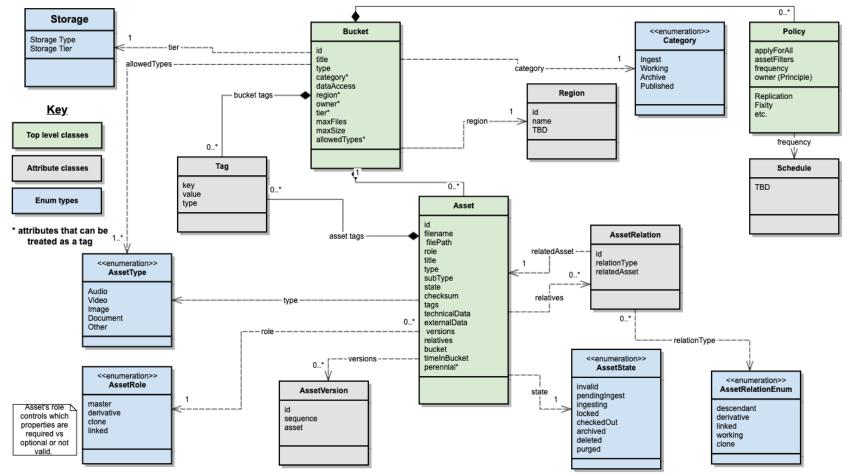

- Storage "Buckets"
  - Mapped to logical units
  - Can be "on-prem" or in cloud
  - abstracted from client usage
- WENDU
  - Workflow Orchestrator
  - Business Rules Engine
  - Enterprise Service Bus
- Federated Search Platform

#### **BUCKETS!**

#### **IO Object Model**

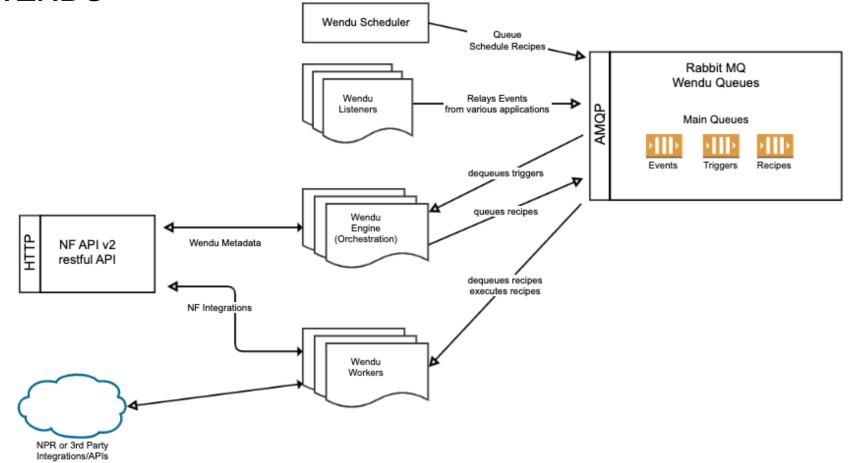

9

#### WENDU

- Workflow Orchestration
- Business Rules Engine
- Enterprise Service Bus

#### WENDU

## **Long-Term Preservation**

- NPR's Research, Archives & Data Strategy team (RAD)
- Historical Storage
- Digitization and Reformatting

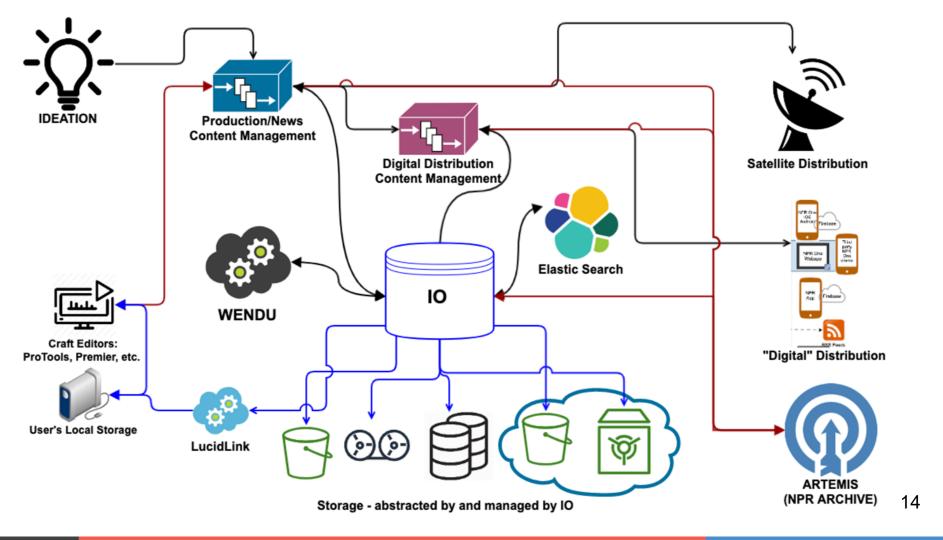

## ΙΟ

- Frictionless workflows
- Enterprise lifecycle management
- Long-term media preservation
